

CNC Workcenter

Up-to-date equipments

- Glass edge machining
- New KITAMURA 5-axis operation CNC workcenter for the high accuracy (5 μ m)
- New acceler 1120 CNC workcenter
- Deckel MAHO CNC workcenter
- High-precision tapered, curvature, elliptic shape / capability

3D Quality Control

- High-precision
- Parallelity / Perpendicularity

ROMER type Multi-gauge
with LEICA optics

Full range of measurement,
evaluation and reporting

Works with CAD models of all types

Analyze results in either 2D or 3D.
